

One-Glance: Dementia 360° Ecosystem + Hawai'i 2035 Plan (Actuals vs Gaps)

This view shows where Hawai'i has built the system (✓), what's in the 2026 pipeline (⌚), and what the State plan still calls for (○).

Bill-to-Ecosystem Crosswalk (Enacted + Next Steps)

Simple story: each bill strengthens a layer; together they build a statewide dementia system.

Bill / Act	Ecosystem layer	Plain-English impact	AA strategic lever
Act 155 (HB1283, 2021)	Crisis + transitions	Allows dementia training for first responders; builds safer encounters and de-escalation readiness.	Enable systems
Act 283 (SB1252, 2025)	Workforce	Builds a dementia-capable workforce via JABSOM training + curriculum + reporting.	Enable systems
Act 286 (HB700, 2025)	Early detection + data	Standardizes validated cognitive assessment in AWV (Medicare B/C) + data pilot to guide policy.	Enable systems / Activate
(Proposed) HB1853 / SB2269 (2026)	Care navigation	HĀNAI Memory Network: dementia care specialists + community memory clinics + coordinated pathway.	Enable systems / Collaborate
(Proposed) SB2867 (2026)	Crisis response	Annual dementia-specific training for EMS + first responders; no-cost access.	Enable systems
(Priority) ADRC @ UH (policy)	Research + translation	Build local Alzheimer's research capacity tailored to Hawai'i's diverse population.	Accelerate research

Message to committees: Hawai'i has already enacted early detection + workforce + safer crisis response. The missing connector is CARE NAVIGATION (HĀNAI) that turns these parts into one reliable pathway for families.

Five-Year Direction of Travel (2021–2026)

From single interventions → to a coordinated statewide system (aligned with Hawai'i 2035 + Alzheimer's Association priorities).

Act 155 (HB1283)

Permits dementia training for first responders; EOA coordination.

Crisis response

2021

BOLD + Hawai'i 2035 plan

Federal BOLD supports infrastructure; Hawai'i 2035 plan sets 4 strategy areas.

Data + policy

2020–2023

Act 286 (HB700)

Standardized cognitive assessment (AWV) + Dementia Data Pilot (EOA).

Early detection

2025

Act 283 (SB1252)

JABSOM workforce: dementia training + curriculum + reporting.

Workforce

2025

Healthy Brain Tracker

Public dashboard for dementia-related data and action.

Data transparency

2025

HĀNAI + annual training

Care navigation network + required annual dementia training (proposed).

System glue

2026

How this aligns to Alzheimer's Association strategic direction

Use this to show your long-term logic: Hawai'i is building toward equitable, quality dementia care + faster research translation.

Activate individuals & communities

Brain health, awareness, stigma reduction
Make screening & early action normal

Enable systems to deliver quality & equitable care

HĀNAI navigation + memory clinics
Workforce training + safer crisis response

Accelerate research, translation & implementation

Build UH research capacity (ADRC concept)
Move evidence into practice statewide

Foster collaboration & understanding

EOA + providers + community organizations
Shared data + shared care pathways

Hawai'i 2035 strategy areas

Data
Program & policy change
Public awareness & education
Workforce development

Where the enacted Acts fit

Act 286 (HB700): Data + early detection
Act 283 (SB1252): Workforce development
Act 155 (HB1283): Program/policy + safer response

What remains to 'complete the system'

Care navigation (HĀNAI)
Sustainable funding + metrics (ROI, ED avoidance)
Research capacity + equitable access across islands
